Thursday, March 25, 2010

Member of Congress
Washington, DC

Dear Representative,

Physician leaders are descending on Congress today to *celebrate and encourage* Members who voted NO on HR 3590.

We're here in Washington, DC following the public launch yesterday of Docs4PatientCare, an organization conceived to give voice to practicing physicians in areas of public policy that affect patient care. A sleeping giant has stirred.

In less than a year, normally apolitical physicians, who focus the bulk of their attention on patients, remaining current on the latest therapies, and complying with onerous government and insurance bureaucracies, have built a grassroots organization of more than 3,000 physicians called Docs4PatientCare.

With the passage of the HR3590, we are now moving to lay the groundwork to prevent the implementation of the most egregious aspects of the "Patient Protection and Affordable Care Act".

The ability to care for our patients (unencumbered by outside bureaucratic influences) is at the heart of why we became physicians. The free market practice of medicine has done the most good for the most people in recorded history.

Our hope is to work with Members of Congress, like yourself, to correct the weaknesses of HR 3590, now Public Law No: 111-148, by presenting a unified voice for actual practicing physicians. We will not quietly accept this radical transformation of our lives' work, our souls' very calling to heal the sick.

Consider the impact of 3,000 doctors motivated to spend just 2 minutes with each patient explaining the damage this health care reform is doing to our practices and to medicine in general. Treating just 10 patients a day will result in more than 600,000 patients a month hearing how their Congressman is fighting to protect their care and the future care of their children.

Consider that we have doubled in size nearly every month since our birth last June.

Consider that doctors are among the most trusted voices speaking to the hearts and minds of our citizens.

Representative, we will specifically *remember your vote and celebrate your public position* in the months concluding 2010. Please contact us regarding any opportunity to strategically impact the future delivery of patient care.

Regards,

Docs4PatientCare
